 Nine months 10.00 One month 1.25
 Six months 6.75 One week35

Subscriptions by mail must be paid in advance.

\$10 REWARD.

A reward of \$10 will be paid for information that will lead to the arrest and conviction of parties stealing The Bonanza from subscribers.

TO SUBSCRIBERS.

Parties who do not receive their papers, or who have any cause of complaint, will oblige The Bonanza by notifying this office.

Entered at the Postoffice in Tonopah as second class matter.

SAGEBRUSH OR SHRUBBERY.

In a few years Goldfield will be a city of lawns. In a few years the appearance of the residence section of Tonopah will be as it is today.

The reason for this is that the water company of Goldfield is progressive enough and has the interest of the city at heart to such an extent that it has seen fit to make a rate of \$2 per month for water used in the sprinkling of lawns.

If the United Water company of this city had a small portion of the pride that the Goldfield company has in their city, our town would and could be made into a city of grass lawns, for it has been demonstrated that the soil here is productive if furnished with plenty of water. But with the present rate in force it would bankrupt a millionaire to irrigate a section large enough for the growing of a single rose bush.

The local water company is in just as healthy a shape as the Goldfield concern, but it has never seen fit to reduce the exorbitant rate that has been in existence since the day it started in business nor has it even hinted at paying a dividend.

We can continue to grow the beautiful sagebrush in our yards instead of lawns and shrubbery and which will be pointed out to the passing tourists as real desert scenery, while the Goldfielders are decorating their city to such an extent that before long it will represent a garden spot such as can be found in California.

As it is we commend the Goldfield water company for its liberality of making our neighbor city one of roses.

TURN THE RASCALS OUT

When one of the most prominent mining promoting firms of the state finds their officers indicted for using the mails to defraud the gullible public, it ought to be time for some of the smaller fry to take notice. Wildcatting in the state of Nevada is doomed, and it means much for the future welfare of the mining interests that this is so. A state law has been enacted that will get the wrong doer in one way and when Uncle Sam withdraws his aid in the schemes, their day is done. The dull times, if such they are, that have visited Nevada during the past year, were the outcome to a great extent of the wildcatting that had been allowed in the state, and to such an extent had this been done, the average investor was afraid to trust his money in any mining proposition. This injured the market for stock that was being sold in a legitimate manner and for a legitimate purpose and today the man that offers stock for sale is considered, to a greater or less extent, to be a fakir, and one who should be duly watched.

Let a few of the fake promoters be placed behind the iron bars, and let Nevada show that it will stand for nothing but legitimate mining propositions, and capital will be coming forward to assist in the development of the mines and the state.—Carson News.

MAC NAMARA PAYS SECOND DIVIDEND

CHECKS MAILED TO STOCKHOLDERS YESTERDAY FROM SAN FRANCISCO.

The dividend of 1 cent per share, declared several weeks ago by the directors of the MacNamara Mining company was mailed the stockholders of that company yesterday in check form from the main office in San Francisco. The total amount of dividend is \$10,000, of which a large portion will be received by local people, as a considerable quantity of stock is held here.

MIAC SHIPS

25 TONS OF ORE

The Dromiac Mining company shipped twenty-five tons of ore to the Iron Ore Purchasing company at last Sunday. The shipment averaged \$125 per ton. Superintendent Hoeffle said that the company would not extract any more ore until the arrival of the eighteen-toner hoist that is now on the shaft has attained a depth of ninety feet, where rich ore is in large quantities. As soon as hoist is installed they should record breaking shipments.—Rustler.

NEVADA MEN WILL INVESTIGATE

WILL INVESTIGATE CONDITIONS AND SUBMIT FINDINGS TO MINING CONGRESS.

Three prominent Nevada mining men have been appointed as a special sub-committee of the American Mining congress for the investigation of forestry conditions in this state, and to receive complaints arising out of the rulings of the forestry bureau as they affect mining operations. O. J. Smith of Reno is chairman, the other members being Captain J. B. Menardi of Reno and Frank J. Nicholas of Carson City, who is the state engineer.

The findings of this committee are to be submitted to the mining congress in Denver, which will in turn take such matters up with the head of the forest service direct. Mr. Pinchor has pledged to the mining congress his personal consideration to all questions submitted by it, and has expressed his willingness to grant reasonable concessions where the rulings of his department create hardship upon any engaged in mining.

Specific complaints are invited since these may lead to such modifications of the forestry rules as will leave the mining industry to the greatest possible extent unhampered by restrictions which delay mining development. As Nevada is a choice field for prospecting and exploration, and as the obstacles to economical and profitable mining in many parts of the state are considerable, all mining men who have just cause for complaint against the forest service are requested to send their complaints to this committee to the end that the mineral development of Nevada may in no wise be retarded by any undue restrictions of the forest service.

PICTURE ROCK IN SILVER BOW PROPERTY

JOHN GREGOVITCH RETURNS FROM THAT CAMP WITH SPECIMENS.

John Gregovich, B. L. Smith, W. J. Bell and C. H. Mace visited Silver Bow Saturday to inspect the property of the Catlin Silver Bow Mining company, of which Mr. Gregovich and Mr. Smith are the owners. The former received a message last week stating that the ledge which the shaft has been sunk on had made a wonderful change and that the value of the ore would go better than \$100 to the ton. Prior to this time the ledge would average about \$40 a ton and the company has about 1500 tons of ore of this class on the dump.

The depth where the values increased is 140 feet from the surface and the extent of the ledge at this point is unknown. Drifting has been started from both sides of the shaft to determine the dimensions of the ore body.

Mr. Gregovich brought back a number of specimens taken from the ledge and all bear a strong resemblance to the ores of the Tonopah mines. A force of four men has been constantly at work on the property for some time and only recently a contract was let by Mr. Gregovich for the sinking of the shaft to an additional depth.

Several shipments were made last year of ore from the ledge, but owing to the long distance to the nearest railroad shipping point the profits were greatly decreased by the time the returns were received. Owing to the fact that the Silver Bow country is situated in a district where there is plenty of fuel and water it is thought that a mill will soon be erected. If this is done the ores can be treated at a handsome profit and will result in several other properties starting operations on a large scale for as it is at the present only the high grade rock can be shipped, the lower grade ore going on the dumps.

READ THEM FOR YOURSELF.

We desire to call your attention to the new advertisements appearing in this morning's Bonanza. As an advertising medium the Bonanza is recognized as the best in the state and is patronized by the leading merchant who wish to secure results.

STOCK MARKET

The market closed with considerable strength yesterday and nearly all the local stocks were good for a small advance. The opening quotations were somewhat weak, but at the closing showed a pick up of strength. Extension and MacNamara both advanced 2 points, while Montana was steady at 70, a gain of 1. The only drop in the local stocks was in Belmont, which lost a point.

Goldfield Consolidated closed at \$8.05, an advance of 12 1/2 points over Saturday's quotations. Florence also went up 7 1/2 points. Booth made an advance of 1 point and reports from Goldfield state that that stock is in demand to such an extent that the brokers are unable to fill the orders. This strength is due to the news received from the leasers who are rapidly nearing the ore shoot that has been traced from the Consolidated Red Top lease. A number of orders have been sent from the east by firms that are eager to secure a stock considered to be one of the favorites of George Wingfield.

The following quotations are from the reliable brokerage firm of H. E. Epstine and company:
